

Truck Brake Assembly

Heavy-duty truck rear axle assembly with differential housing, brake drums, and air brake actuators. It is designed for commercial vehicle applications, providing reliable torque transfer and braking performance.

Product Overview

Heavy-Duty Axle and Brake System

This heavy-duty truck rear axle assembly is engineered for demanding commercial vehicle applications. It features a robust differential housing, durable brake drums, and high-performance air brake actuators, ensuring reliable torque transfer and stopping power. Designed for seamless integration, the unit includes pre-drilled suspension mounting points for easy installation onto standard truck chassis configurations.

Technical Specifications

Included Components

- Differential housing
- Brake drums
- Air brake actuators
- Suspension mounting points

Application

Heavy-Duty Truck, Commercial Vehicle, Rear Axle
