Product Overview

High-Performance Truck Brake Linings

This comprehensive catalogue features a wide range of truck brake linings engineered for reliability and safety. These components are manufactured without asbestos, meeting strict environmental protection requirements. Designed to withstand demanding conditions, they offer excellent thermal recession and recovery performance, making them suitable for mountain roads and high-speed, high-temperature operations.

Technical Features

Environmental Compliance

Asbestos-Free

Performance Benefits

High-Temperature Resistance, Thermal Recovery, Thermal Recession Resistance

Applications

Compatible Vehicle Manufacturers

- Volvo
- Renault/RVI
- Iveco
- DAF
- Nissan
- MAN
- Hino
- ERF
- Pegaso
- Seddon Atkinson
- Crane Fruehauf
- Foden
- Kassbohrer
- Van Hool

Specification Data

Catalogue Data Overview

Parameter	Details Included
Identification	BFMC Number, WVA Number
Dimensions	Inner Arc Length, Width, Thickness
Installation	Hole Size, Rivet Size
