

Truck Engine Oil Seal

This oil seal is specifically designed for use in truck engines. It creates a secure barrier, preventing oil leakage and ensuring efficient engine operation.

Product Overview

High-Performance Engine Sealing Solution

This premium engine oil seal is engineered specifically for heavy-duty truck engines to prevent lubricant leakage and protect internal components from contaminants. Designed for durability under extreme thermal and mechanical stress, this component ensures long-lasting reliability and engine efficiency. Its precise construction facilitates a perfect fit, reducing maintenance downtime and helping to extend the lifespan of the engine assembly.

Technical Details

Primary Application	Commercial Truck Engine
Component Category	Rotary Shaft Oil Seal
Material Certifications	Oil Resistant, Heat Resistant, High Elasticity

Performance Metrics

Operational Performance

150 °C

Max Temperature Tolerance

0.5 MPa

Pressure Rating
