Product Overview

High-Performance Air Filtration

This main filter assembly is engineered for heavy-duty vehicle air intake systems, ensuring optimal engine protection by effectively removing contaminants. Featuring a robust cylindrical design with a pleated filter element, it provides reliable particle removal to maintain engine longevity. The assembly is built to withstand demanding operating conditions, making it an essential component for consistent performance.

Technical Specifications

Model Number	C 27 1050
Part Reference	TD-U0475
EAN/Barcode	4057729380324

Design and Construction

Sealing System

Orange/Red Sealing Ring (Top) • Orange/Red Sealing Ring (Bottom)

Design Features

Cylindrical Design, Pleated Filter Element, Reinforced Mesh Base

Compatibility

Compatible Vehicle Types

- Heavy-duty trucks
- HOWO truck series
