Product Overview

Versatile Concrete Pumping Solution

This truck-mounted concrete boom pump is engineered for high-efficiency concrete transportation in complex construction environments. It features a robust multi-section boom design, ensuring extended reach and precise placement for large-scale infrastructure projects, bridges, and high-rise developments. Built with globally recognized hydraulic and power components, the equipment delivers continuous high-output flow with exceptional reliability on diverse job sites.

Technical Specifications

Compatible Pump Series

- HBT30
- HBT40
- HBT50
- HBT60
- HBT80
- HBT90
- HBT100
- JBTS30
- JBTS40

Available Boom Lengths

25m, 29m, 33m, 42m, 50m

Key Performance Metrics

Operational Performance

50 m

Max Boom Reach

Components and Quality

Chassis Options

Mercedes-Benz • Isuzu • Dongfeng Ace • Sinotruck Howo

Engine Brands

Deutz • Cummins • Weichai

Hydraulic & Seal Suppliers

- Rexroth
- Kawasaki
- Atos
- Manuli Parker
- NOK
