

Truck Mounted Concrete Boom Pump

This truck-mounted concrete boom pump is designed for efficient and precise concrete placement. It features a robust boom with a reach of up to 62 meters, offering exceptional maneuverability.

Overview

Product Show

High-Performance Concrete Boom Pump

The TP62RZ6 is a professional-grade truck-mounted concrete boom pump engineered for high-volume, precise concrete placement in demanding construction environments. With a vertical reach of 61.1 meters and a maximum output of 180 cubic meters per hour, it offers the performance required for large-scale infrastructure and high-rise building projects. The unit features advanced energy-saving technology, robust wear-resistant components, and comprehensive safety monitoring systems to ensure reliability, efficiency, and operator safety on-site.

Technical Specifications

TRACON
TRACON Truck Mounted Boom Pump

TRACON Max Technical Specifications

Item	Parameter	Value
1	Max. Theoretical Output	180 m ³ /h
2	Max. Theoretical Pressure	8.6 MPa
3	Max. Horizontal Reach	55.9 m
4	Max. Vertical Reach	61.1 m
5	Max. Travel Speed	<85 km/h
6	Max. Overall Dimensions	15200x2530x4000 mm
7	Max. Axles	8x4
8	Max. Engine Power	300 kW
9	Max. Total Weight	47700 kg

Key Performance Metrics

61.1 m

Vertical Reach

55.9 m

Horizontal Reach

180 m³/h

Max Theoretical Output

8.6 MPa

Max Theoretical Pressure

Chassis and Dimensions

Feature	Value
Axles	8x4
Engine Power	300 kW
Max Travel Speed	<85 km/h
Total Weight	47700 kg
Overall Dimensions	15200x2530x4000 mm

Features

Advanced Technologies

- Self-adaptive energy-saving pumping technology (10%+ fuel efficiency improvement)
- Boom anti-vibration technology reducing vibration amplitude by 50%
- One-button twin piston return system for easy maintenance
- Automatic pressure relief for swing cylinders
- Integrated fault diagnosis and real-time monitoring system

Safety Systems

Vehicle tilt sensor, Outrigger limit switch, Rotary encoder, Cylinder locking function, Emergency sound/light alarms
