Product Overview

High-Performance Truck-Mounted Concrete Line Pump

This truck-mounted concrete line pump is engineered for efficient, versatile, and precise concrete delivery across various construction sites. Featuring a robust pumping system and intelligent control technology, it offers reliable performance for projects ranging from residential to infrastructure development. The unit is designed for ease of operation, maintenance, and mobility, ensuring high productivity and minimal downtime on the job.

Performance Metrics

Max Theoretical Output (Low/High)

100 m³/h
Low Pressure

55 m³/h
High Pressure

Max Concrete Pressure (Low/High)

9 MPa
Low Pressure

18 MPa
High Pressure

Technical Specifications

Concrete Cylinder (Bore x Stroke)	230 x 1800 mm
Hopper Capacity & Feeding Height	0.7 m ³ / 1460 mm
Outlet Diameter	DN 150
Distribution Valve	S Valve
