

Truck-Mounted Concrete Placement Boom

This truck-mounted concrete placement boom features a multi-section hydraulic boom for concrete placement. It is designed for large-scale construction projects, offering efficient and reliable concrete delivery to elevated or hard-to-reach areas.

Overview

High-Efficiency Concrete Placement

This heavy-duty truck-mounted concrete placement boom is engineered for large-scale construction projects requiring reliable and precise delivery. Featuring a multi-section hydraulic boom system, it provides excellent reach for elevated or hard-to-access areas. The robust multi-axle truck chassis ensures superior stability, weight distribution, and maneuverability on demanding job sites.

Technical Specifications

Integrated Systems

- High-capacity pumping system
- Precision hydraulic control mechanisms
- Stabilization outriggers

Equipment Type	Truck-Mounted Concrete Placement Boom
Chassis Configuration	Multi-axle heavy-duty truck
Operation Mechanism	Hydraulic multi-section boom

Capabilities

Performance Highlights

1 Multi

Boom Sections

1 Multi-Axle

Chassis Type

Application Suitability	Large-scale construction, Elevated concrete delivery, Hard-to-reach areas
