

Truck-Mounted Concrete Pump

This is a truck-mounted concrete pump designed for construction sites. It features a multi-section boom and hydraulic system for efficient concrete placement.

Overview

High-Performance Concrete Pumping Solution

This truck-mounted concrete pump is engineered for efficient, high-volume concrete placement on demanding construction sites. Featuring a robust multi-section boom and advanced hydraulic systems, it offers exceptional reach and precision. The unit is designed for rapid deployment and stability, ensuring reliable operation in various infrastructure projects.

Technical Specifications

Equipment Type	Truck-Mounted Concrete Pump
Key Features	Multi-section boom, Hydraulic system, Outriggers for stability, High-volume pumping

Performance Metrics

Performance Highlights

1 Truck-Mounted
Operational Mode

Operational Details

Design Focus

- Efficient concrete placement
- Enhanced mobility
- Construction site versatility
- Structural stability
