

Truck-Mounted Concrete Pump

This truck-mounted concrete pump delivers concrete with a maximum transmission pressure of 18 Mpa. Its stepless adjusting emissions meet varied operational demands.

Overview

High-Performance Concrete Pumping Solution

This truck-mounted concrete pump is engineered for efficient concrete delivery and placement in demanding construction environments. It features a robust high-pressure pumping system and advanced intelligent control technology to ensure reliability and precision. Designed for versatility, it is suitable for high-rise buildings, bridges, and large-scale infrastructure projects.

Performance Metrics

Pumping Capacity

94 m³/h

Max Pumping Capacity

Max Transmission Pressure	18 Mpa
Pumping Engine Power	186 kW

Technical Features

Hydraulic System

- Full hydraulic reversing system
- High oil cleanliness
- Low oil temperature
- Minimal impulsion

Control System	Intelligent Control, Automatic Protection, Fault Diagnosis
----------------	--

Maintenance & Design

Patented Technologies

High/Low Pressure Switch • Waterproof Seal • Wear-Resisting Port

Maintenance Features

- Concrete piston automatic return
- Easy piston detection and replacement
- Stepless emissions adjustment
- Leak-free high/low pressure switching
