

Truck-Mounted Concrete Pump with Multi-Section Boom

This is a heavy-duty concrete pump mounted on a truck chassis. The pump has a multi-section boom that allows for accurate concrete placement.

Product Overview

High-Efficiency Concrete Placement

This truck-mounted concrete pump is engineered for large-scale construction projects requiring reliable and precise concrete delivery. Featuring a robust multi-section boom system, it allows for flexible reach and accurate placement on complex job sites. The heavy-duty chassis is equipped with multiple axles to ensure optimal weight distribution and stability during operation.

Technical Specifications

Boom Configuration	Multi-section boom
Chassis Design	Heavy-duty truck chassis
Stability Features	Multi-axle design, Weight distribution optimized

Application

Primary Applications

- Large-scale construction
- High-rise concrete delivery
- Infrastructure projects
