# Truck-Mounted Concrete Pump

This truck-mounted concrete pump is designed for efficient concrete delivery. It features a robust chassis, a high-capacity pumping unit, and a versatile boom system for precise placement.

## Product Overview

### High-Efficiency Concrete Delivery

This truck-mounted concrete pump is engineered for reliability, efficiency, and cost-effectiveness on demanding construction sites. Featuring a sophisticated hydraulic system with high-quality components, it offers versatile control for various job site requirements. The system supports remote operation and easy positioning via four hydraulic support stands, ensuring maximum productivity and ease of use.

## Technical Specifications

**Key Operational Features**

- Remote controller included
- Four hydraulic support stands for positioning
- No need to dismantle tubes during operation
- Integrated high/low pressure switch control
