Product Overview

Professional Lifting Capability

This truck-mounted crane is engineered for demanding industrial and construction environments where precision and heavy lifting power are essential. Featuring a high-capacity hydraulic crane system, this vehicle combines mobility with robust lifting performance. It is designed to streamline logistics and material handling, making it an ideal asset for infrastructure projects and industrial site operations.

Technical Specifications

Crane Model	SPS 20000
Truck Chassis	Chenglong M3

Key Metrics

Lifting Class

20 ton-m

Model Capacity Index

Operational Features

Key Features	Hydraulic Control System, Heavy-Duty Chassis, Industrial Grade, High Mobility
