

Truck Mounted Knuckle Boom Crane

This truck-mounted crane features a knuckle boom design for flexible operation. It is suitable for transportation, oil, telecommunications, electricity, and municipal services.

Overview

High-Performance Knuckle Boom Crane

The SQ10ZA3 truck-mounted knuckle boom crane is engineered for efficient loading and unloading operations in confined spaces. With a robust lifting capacity of 10,000 kg and a 360-degree rotation angle, it offers exceptional versatility for various industrial applications. Its compact design and integrated hydraulic stability features make it a reliable choice for professional logistics and construction tasks.

Performance Metrics

Max Lifting Capacity

10000 Kg

Max Lifting Capacity

20 T.m

Max Lifting Moment

Rotation Angle

360 °

Hydraulic System

Rated Pressure

28 MPa

Max Oil Flow

40 L/min

Oil Tank Capacity

150 L

Technical Specifications

Crane Weight

3300 Kg

Recommended Power

35 KW

Installation Space

1200 mm

Model Number

SQ10ZA3
