Overview

High-visibility components including the telescopic mast, air-wheel base, and integrated generator system.

Industrial-Grade Illumination

This telescopic LED light tower is engineered for high-performance outdoor illumination in demanding construction and industrial environments. Featuring a manual vertical mast that extends up to 5.5 meters, it provides wide-area coverage of 2500 square meters. The unit combines energy-efficient LED technology with a long-lasting lifespan of 60,000 hours, ensuring reliable performance and reduced maintenance for professional worksites.

Technical Specifications

Ready-to-ship configuration including trailer mount, generator, and protective packaging.

Light Coverage	2500 m2
Maximum Mast Height	5.5 m
Lamp Life Expectancy	60000 hrs
Mast Operation	Vertical Manual
Lighting Technology	LED, Energy Efficient

Performance

Robust, mobile lighting solution designed for industrial applications.

Performance Highlights

4 units

LED Lamps

1600 W

Total Wattage
