

# Truck Refrigeration Compressor Shaft Seal 22-1100

This shaft seal is designed for truck refrigeration compressors. It ensures a leak-proof connection, maintaining optimal performance and efficiency of the refrigeration system.

## ADDITIONAL IMAGES

## Overview

# Description

### Professional Refrigeration Sealing Solution

This high-performance compressor shaft seal is designed specifically for demanding transport refrigeration applications. Engineered for durability and reliability, it ensures a leak-proof barrier that maintains optimal system pressure and cooling efficiency. Its wear-resistant construction and low-friction design make it an essential component for maintaining consistent temperature control in mobile environments.

## Key Features

# Product photo

### Main Advantages

Wear resistant, Superior sealing effects, Low friction, Easy replacement, Wide application

## Technical Specifications

Model Number

HF22-1100

Material

Stainless Steel, SUS304, SUS316

## Operating Parameters

### Operating Limits

**1.2 Mpa**

Maximum Pressure

**3000 rpm**

Maximum Speed

## Manufacturing & Support

### Support Services

- Free drawing provision with mass production
- ODM and OEM services available
- Technical video support
- 1-year quality guarantee

Customization

Yes
