

Truck Tire Butyl Inner Tube

Butyl inner tubes are designed for heavy-duty truck tires. They are available in 20-inch and 24-inch sizes.

Product Overview

Heavy-Duty Butyl Inner Tube

Engineered for durability and reliability, this butyl rubber inner tube is designed specifically for heavy-duty truck applications. It offers superior air retention and resistance to punctures and abrasions, ensuring extended service life even in demanding road conditions. This high-performance component is built to meet rigorous international quality standards for safety and consistency.
