

Truck Tire Inner Tube

This inner tube is designed for truck tires. It is made from durable rubber for good air retention and resistance to punctures.

Product Overview

Heavy-Duty Performance

This high-quality inner tube is specifically engineered for truck tires, utilizing a durable rubber compound designed for optimal air retention and puncture resistance. It ensures reliable performance and an extended service life even under demanding commercial operating conditions. The design includes a standard valve stem, ensuring seamless compatibility with common air pumps and simplifying maintenance for heavy-duty vehicle fleets.

Technical Details

Material Features

Durable Rubber Compound • High Air Retention • Puncture Resistant

Application	Commercial Vehicles, Heavy-Duty Trucks
Valve Stem	Standard
