

Truck Tire Inspection Tank

This truck tire test tank is designed for inspecting tires for leaks and damage. It features a heavy-duty steel construction, a lifting mechanism for easy tire submersion, and a water containment system.

Product Overview

Professional Tire Inspection Solution

This truck tire inspection tank is engineered for precision leak detection and structural damage assessment in commercial vehicle tires. Featuring a robust, heavy-duty steel construction, it provides a safe and reliable environment for maintenance professionals. The integrated lifting mechanism streamlines the submersion process, ensuring efficient and ergonomic tire handling in demanding automotive service environments.

Technical Specifications

Material	Heavy-duty steel
Key Capabilities	Leak Detection, Damage Assessment, Heavy-duty Construction, Integrated Lifting Mechanism

Application

Suitable Environments

- Automotive repair shops
- Tire service centers
