

Truck Wheel Hub

This wheel hub is suitable for use in trucks and construction machinery. It is constructed from ductile iron casting.

Product Overview

High-Performance Truck Wheel Hub

This heavy-duty wheel hub is engineered for demanding truck and construction machinery applications, offering exceptional structural integrity. Manufactured from premium ductile iron using advanced casting techniques, it ensures consistent quality and long-term reliability. Each unit undergoes rigorous testing, including non-destructive and tensile strength assessments, to meet high industrial performance standards.

Physical Properties

Key Specifications

32.8 kg

Weight

335 mm

Hole Dividing Round

374 mm

Outer Diameter

Technical Details

Material	Ductile Iron Casting
Certifications	ISO, TS

Logistics and Customization

Delivery Ports

- Shanghai
- Wuhan

Place of Origin	Suizhou, Hubei Province
Packaging	Wood pallet or customer requirements

Manufacturing and Quality

Manufacturing Process

- Lost foam production line
- Tokyu molding line
- Auto hydrostatic pressure production line
- CNC machining center

Testing Equipment

- Non-destructive testing
- Tensile strength testing
- Hardness tester
- Spectrometer
- CS analyzer
- Parallel tester
