Product Overview

High-Efficiency Air Purification

This advanced air purifier is designed for large rooms, delivering a clean air delivery rate (CADR) of 500m³/h to ensure rapid and effective purification. It utilizes a comprehensive 7-stage filtration system, including True HEPA and activated carbon, to target pollutants ranging from PM2.5 and allergens to bacteria and viruses. Equipped with smart dual sensors and WiFi connectivity, it provides real-time air quality monitoring and convenient control for a healthier indoor environment.

Performance & Filtration

CADR
