

Tube Cleaning Brush

Tube brushes are versatile cleaning tools for scrubbing the interior of tubes, pipes, and cylinders. These brushes consist of a handle and a brush head with durable bristles made of steel, nylon, or brass.

Product Overview

Professional Tube Cleaning Solutions

Tube cleaning brushes are essential industrial tools designed for the effective removal of debris, scale, rust, and residue from internal surfaces. Featuring durable bristles attached to a secure stem, these brushes offer the perfect balance of rigidity and flexibility required for hard-to-access areas. They serve a wide range of professional applications including automotive maintenance, plumbing, HVAC systems, and precision manufacturing.

Technical Specifications

Bristle Material Options	Steel, Nylon, Brass
Construction Method	Twisted wire stem or molded plastic core

Application

Industry Applications

- Automotive
- Plumbing
- HVAC
- Manufacturing

Common Cleaning Tasks

Debris Removal • Scale Removal • Rust Prevention • Residue Clearing
