

Tube Cutter Hand Tool

This tube cutter is a hand tool used to cut tubes, typically made of copper, aluminum, or plastic. It consists of a sharp cutting wheel and two rollers that hold the tube in place.

Overview

Professional Tube Cutting Solution

This manual tube cutter is an essential hand tool designed for precise cutting of copper, aluminum, and plastic tubing. Featuring a sharp cutting wheel and stabilizing rollers, it ensures clean, burr-free cuts every time. It is an ideal choice for professionals in plumbing, HVAC, and related industries requiring high-quality pipe preparation.
