

Tube Ice Production Machine

This industrial tube ice machine is engineered for the continuous production of tube ice. It features a robust frame, advanced controls, and a high-efficiency refrigeration system for reliable operation.

Zhejiang Qiyuan Refrigeration Equipment Manufacturing Co., Ltd

Product Overview

Industrial Tube Ice Production

This tube ice production machine is designed for continuous, high-efficiency output suitable for daily commercial consumption. The system produces hard, hollow cylindrical ice with minimal water content, making it ideal for food storage, beverage cooling, and fresh-keeping applications. Every unit is fully tested prior to delivery, ensuring seamless integration and reliability in your operational environment.

Technical Specifications

Tube Ice Geometry

Dimension	Range/Value
Outer Diameter	ø 22mm, ø 29mm, ø 35mm
Inside Diameter	ø 5mm - ø 10mm (Adjustable)
Ice Length	20mm - 50mm

Water Content	2 %
---------------	-----

Design and Build

Material Quality	Stainless Steel, Rust-resistant Materials
------------------	---

Operational Details

Shipping Protection

- Air bubble film
- Wooden box

Installation Requirements	Pre-tested system; requires only water pipe and power connection.
---------------------------	---

Performance

System Performance

High Efficiency • Energy-saving Design • Continuous Production
