

# Tube Ice Production Machine

This machine is designed for efficient tube ice production. The resulting ice is cylindrical with a hollow center.

## Product Overview

### Professional Tube Ice Solution

This high-efficiency tube ice machine is designed for daily consumption and professional applications, including beverage modulation and food storage. The system features a robust design with all water-contact surfaces crafted from stainless steel or rust-resistant materials. Engineered for ease of use, each unit is fully tested before delivery, requiring only simple water and power connections for immediate operation.

## Technical Specifications

### Ice Tube Properties

Attribute	Measurement Range
Outer Diameter	22mm, 29mm, 35mm
Inside Diameter	5mm - 10mm
Ice Length	20mm - 50mm
Water Content	d 2%

### Material & Quality

Stainless Steel, Rust-resistant, Food-grade construction

## Logistics & Installation

### Packaging

- Air bubble film interior
- Wooden crate exterior

### Installation Requirements

Pre-installed and factory-tested; requires only water pipe and power connection.
