

Tubeless Tire Valve for Motorcycle and Bicycle

This tubeless valve is designed for use on motorcycle and bicycle tires. It is constructed from durable materials for reliable performance.

Product Overview

High-Performance Tubeless Valve

This high-quality tubeless valve is engineered specifically for motorcycles and bicycles, offering a reliable solution for tire maintenance. Constructed with durable materials, it ensures long-lasting performance and consistent air retention. The product features a specialized curved design that provides easy access for inflation, making it an ideal choice for replacing worn or damaged valves to maintain optimal tire pressure and safe riding conditions.

Technical Specifications

Valve Type

Tubeless

Key Features

- Curved design for easy access
- Durable construction
- Optimized for inflation reliability

Model Number	PVR70
Secondary ID	LXV047
Compatibility	Motorcycle, Bicycle
