

Tubular Steel Grille Guard

This grille guard is designed to protect the front of a vehicle, including the grille, headlights, and bumper. It is constructed from steel tubing and mounts directly to the vehicle's frame for reliable protection against impacts.

Product Overview

Robust Front-End Protection

The Tubular Steel Grille Guard is an essential vehicle accessory engineered to shield the front end from damage. Constructed from durable steel tubing, it provides a reliable barrier for the grille, headlights, and bumper against brush, debris, and minor impacts. Its frame-mounted design ensures maximum stability and long-term performance for professional applications.

Technical Specifications

Material	Steel
Design Style	Tubular
Mounting Method	Frame-mounted
Protection Coverage	Grille, Headlights, Bumper

Key Features

Design Highlights

- Multiple horizontal bar configuration
- Tubular steel construction
- Direct frame mounting for stability
