

# Tuck Point Diamond Blade for Mortar Removal

This tuck point diamond blade is engineered for efficient and precise mortar removal. The segmented rim design ensures optimal debris removal and cooling, reducing heat buildup and preventing warping.

## Product Overview

### Professional Mortar Removal Solution

The Tuck Point Diamond Blade is engineered for efficient and precise mortar removal in professional tuckpointing applications. Featuring a durable steel core and high-quality diamond segments, this blade offers exceptional cutting performance and an extended operational lifespan. Its segmented rim design facilitates optimal debris removal and heat dissipation, ensuring consistent results and preventing blade warping during heavy-duty use.

## Technical Specifications

Application Type	Tuck Pointing
Compatible Materials	Mortar, Masonry

## Design Features

### Rim Configuration

Segmented Rim • Heat Dissipation Optimized
