

Tuck Point Diamond Blade for Mortar Removal

Professional grade tuck pointing diamond blade designed for mortar removal and repair. Features segmented rim for fast, efficient cutting and extended blade life.

Product Overview

Professional Mortar Removal Solution

This professional-grade tuck pointing diamond blade is engineered specifically for efficient mortar removal and masonry repair tasks. Featuring a high-performance segmented rim, it ensures fast cutting speeds and an extended operational lifespan across various materials. Designed for versatility, the blade performs reliably in both dry and wet cutting environments, making it an ideal choice for brick, block, and concrete applications.

Technical Specifications

Compatible Materials	Brick, Block, Concrete
Application Method	Dry Cutting, Wet Cutting

Performance Features

Key Benefits

- Fast and efficient mortar removal
- Extended blade life
- Consistent diamond matrix performance
- High durability for masonry repair

Rim Type	Segmented Rim
