

Tunable Optical Filter

This is a tunable optical filter. It is designed to select a specific wavelength range from a broader spectrum of light.

Product Overview

Precision Tunable Optical Filter

This tunable optical filter is designed for professional applications requiring precise light modulation and protection. The unit features advanced auto-darkening technology, ensuring rapid response times when welding arcs are detected. Built for durability and comfort, it offers adjustable settings to cater to diverse industrial environments and user requirements.

Technical Features

Material Characteristics

- Heat-resistant
- Durable construction

Filter Type	Auto-darkening filter (ADF)
Adjustable Parameters	Sensitivity, Delay
