Product Overview

Professional Grade Cutting Performance

This circular saw blade is specifically engineered for high-efficiency grass cutting applications. Featuring premium tungsten carbide tipped teeth, it provides exceptional durability and clean cuts for professional lawn care equipment. The design incorporates weight-reduction and heat-dissipation holes to ensure smooth operation during prolonged use.

Technical Specifications

Available Diameters

- 230mm
- 255mm
- 305mm

Material Composition

High-quality steel with YG8 alloy cutter head

Key Features

Design Metrics

3 count

Available Size Variants

Performance Benefits

Enhanced Durability, Wear Resistance, Vibration Reduction, Improved Cooling
