

Tungsten Carbide Tipped Circular Saw Blade

These professional T.C.T sawblades are designed for cutting wood. They can be used on portable circular saw machines or power tools.

Product Overview

Industrial Grade TCT Saw Blades

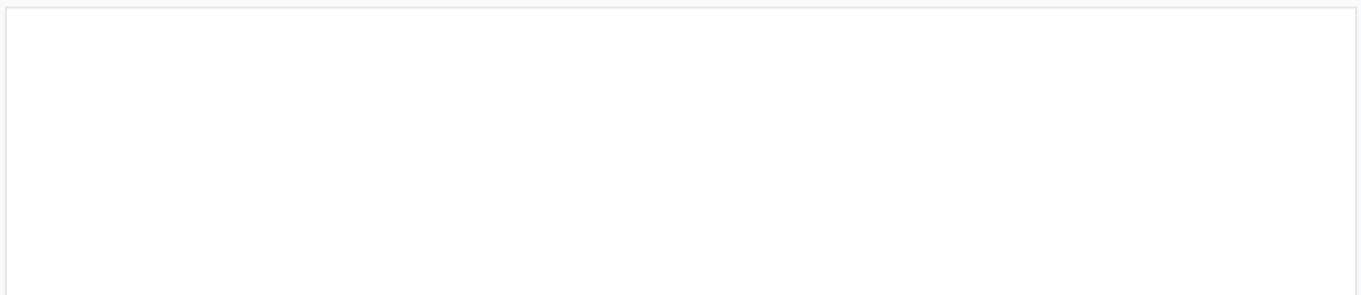

These professional-grade Tungsten Carbide Tipped (T.C.T) saw blades are engineered for high-performance wood cutting applications. Featuring heat-treated bodies, Teflon coating, and low-noise technology, they ensure smooth operation and extended durability. They are versatile, catering to both portable power tools and large-scale industrial table saw machines.

Key Features

Attributes

Tungsten Carbide Tipped, Heat-Treated Body, Teflon Coated, Low Noise Design

Technical Specifications
