

Tungsten Carbide Tipped Circular Saw Blade

This general purpose saw blade features a circular steel body with tungsten carbide tipped teeth. It is suitable for use with circular saws and table saws.

Product Overview

Versatile Cutting Solution

This tungsten carbide tipped (T.C.T) circular saw blade is engineered for efficient and clean cuts across a variety of materials. Designed for use with both circular and table saws, it is an ideal choice for woodworking, construction, and general cutting tasks. The precision-ground teeth work in tandem with a specialized body design to minimize vibration and noise, ensuring a superior user experience and consistent performance.

Technical Specifications

Equipment Compatibility

- Circular saws
- Table saws

Blade Type

Tungsten Carbide Tipped (T.C.T)

Performance Features

Performance Highlights

Low Vibration, Noise Reduction, Precision-Ground, High Durability

Applications

Primary Applications

Woodworking • Construction • General Cutting
