

Tungsten Carbide Tipped Grass Cutting Blade

This circular saw blade is designed for cutting grass and vegetation. It features tungsten carbide tipped (TCT) teeth for enhanced durability and cutting performance.

Product Overview

High-Performance Cutting Solution

This circular saw blade is specifically engineered for professional grass and vegetation management. Featuring durable tungsten carbide tipped (TCT) teeth, it delivers superior cutting performance and extended service life. The design incorporates a central mounting hole and teardrop-shaped cutouts to optimize weight and enhance airflow for efficient operation.

Technical Specifications

Material	Tungsten Carbide Tipped
Design Features	TCT Teeth, Teardrop Cutouts, Lightweight Design, Airflow Optimization

Applications

Compatible Equipment

- Brush Cutters
- Trimmers

Application Fields

Gardening • Landscaping • Vegetation Control
