

Tungsten Inert Gas Welding Consumables Set

This set includes consumables for Tungsten Inert Gas (TIG) welding. It features tungsten electrodes, welding rods, and a specialized cleaning brush.

ADDITIONAL IMAGES

Product Overview

Professional TIG Welding Consumables Suite

This comprehensive set of Tungsten Inert Gas welding consumables is designed for precision applications across a wide range of metal types, including carbon steel, stainless steel, aluminum, and copper alloys. Engineered for reliability, these components support high-accuracy welding tasks necessary for demanding industrial environments. The set includes specialized electrodes and maintenance tools to ensure consistent weld quality and longevity in complex fabrication projects.

Compatibility & Applications

Target Industries

- Shipbuilding
- Offshore Platforms
- Petrochemical
- Pressure Vessels
- Power Plants
- Mining
- Structural Construction
- Automotive

Compatible Materials

Carbon Steel, Stainless Steel, Low Alloy Steel, Cast Iron, Nickel Alloy, Copper Alloy, Aluminum Alloy

Electrode Specifications

Electrode Identification

Yellow Sleeve Electrode • Red-Coated Rod

Maintenance

Surface Preparation Tool

Professional-grade surface cleaning brush with long handle for debris and oxide removal.
