

Tunnel Type Shrink Packaging Machine

This tunnel-type shrink packaging machine wraps products with heat-shrinkable film. The machine uses a conveyor belt system to move products through a heated tunnel, where the film shrinks tightly around the product.

Overview

Professional Shrink Packaging Solution

This tunnel-type shrink packaging machine is engineered for high-efficiency wrapping using heat-shrinkable film. Featuring an integrated conveyor belt system, it ensures consistent results by moving products through a controlled heated tunnel where the film shrinks tightly around the item. Equipped with an intuitive control panel for precise temperature and speed adjustments, this machine is suitable for a wide range of industrial packaging applications.

Technical Specifications

Machine Type	Tunnel Type Shrink Packaging Machine
Operating Mechanism	Conveyor belt system with heat-shrink tunnel
Control Features	Adjustable Temperature, Adjustable Conveyor Speed, Manual Control Panel
