

Turbo Diamond Concrete Grinding Disc

This turbo diamond grinding disc is designed for concrete grinding applications. It features a segmented diamond matrix for efficient material removal and a durable construction for extended tool life.

Product Overview

Turbo Diamond Concrete Grinding Disc

This high-quality turbo wave diamond abrasive disc is engineered for efficient material removal on concrete surfaces. Featuring a reinforced matrix consolidated by high-temperature heat treatment, it offers enhanced durability for demanding grinding tasks. The specialized turbo design promotes superior airflow, which effectively reduces heat buildup during operation and significantly increases overall grinding speed.

Technical Specifications

Arbor Hole Diameter	22 mm
Abrasive Technology	Turbo Wave, Diamond Segmented

Packaging and Logistics

Individual Packaging	Color box
----------------------	-----------

Performance Features

Performance Benefits

- Optimized airflow for heat reduction
- High-speed material removal
- Professional-grade heat-treated construction
- Consistent surface finishing
