

# Turbo Diamond Cup Wheel with Aluminum Core

This diamond cup wheel features a turbo design for efficient material removal. Constructed with an aluminum core, it offers lightweight durability and effective heat dissipation.

## Product Overview

### Turbo Diamond Cup Wheel

This diamond cup wheel features a specialized turbo design engineered for efficient material removal and aggressive cutting action. Constructed with a lightweight aluminum core, it offers enhanced heat dissipation and durability during operation. It is an ideal solution for grinding, shaping, and polishing concrete, stone, and various masonry materials, designed specifically for use with angle grinders.

## Technical Specifications

Core Material	Aluminum
Design	Turbo

## Applications & Compatibility

### Compatible Tools

- Angle Grinder

Compatible Materials	Concrete, Stone, Masonry
----------------------	--------------------------

## Key Features

### Performance Highlights

<b>1 High</b> Heat Dissipation	<b>1 Lightweight</b> Weight
