

Turbo Diamond Saw Blade for Stone Cutting

This is a diamond circular saw blade made with a cool pressed process. It is designed for general purpose cutting of concrete, granite, marble, and stone.

Product Overview

Professional Turbo Diamond Blade

This high-performance turbo diamond saw blade is engineered for precision cutting across a wide range of stone and tile materials. Featuring a specialized continuous turbo rim, it ensures fast, smooth, and chip-free finishes for granite, marble, porcelain, and ceramic. The blade is constructed with a hardened steel core and premium diamond grit, offering excellent durability for both wet and dry operational environments.

Technical Specifications

Compatible Equipment

- Angle Grinders
- Circular Saws
- Tile Saws

Suitable Materials	Granite, Marble, Ceramic, Porcelain, Tile
Model Identifier	CCT.201
Cooling Mechanism	Yes

Performance Features

Key Performance Attributes

1 Wet/Dry

Cutting Type

1 Turbo

Rim Design

Build Quality

Hardened Steel Core • High-Quality Diamond Grit • Anti-Chip Geometry
