

Turbo Rim Diamond Blade for Angle Grinders

This diamond blade is designed with a turbo rim for efficient material removal. It is suitable for angle grinders and circular saws, with a 115mm diameter and 22.2mm arbor.

Product Overview

High-Performance Cutting Precision

This turbo rim diamond blade is engineered for professional-grade cutting performance on a wide range of natural and synthetic stones. Designed for versatility, it supports both wet and dry cutting applications to suit various job site requirements. With a robust diamond-infused rim, it ensures smooth, efficient material removal and long-lasting durability for demanding tasks.

Technical Specifications

Maximum Operating Speed

13200 RPM

Max Speed
