

Turbo Segmented Diamond Saw Blade

This blade's 10mm segments contribute to an extended cutting life. Small core holes promote rapid cooling and reduced operational noise.

Product Overview

Turbo Segmented Diamond Saw Blade

This turbo-segmented diamond blade is engineered for high-performance cutting across a wide range of construction materials, including granite, marble, concrete, and roofing tiles. Featuring a segmented rim design, it delivers aggressive cutting speeds while incorporating cooling holes to dissipate heat and minimize blade warping. This versatile tool is suitable for both wet and dry cutting applications, making it an essential choice for angle grinders, circular saws, and tile saws.

Technical Specifications

Available Diameters

- 105
- 115
- 125
- 150
- 180
- 200
- 230
- 250

Usage Type

Wet Cutting • Dry Cutting

Compatible Materials

Granite, Marble, Roofing Tiles, Concrete, Masonry
