

# Turbo Wave Diamond Cutting Disc with Fine Tooth

This diamond cutting disc is designed for cutting hard materials like tile, stone, and concrete. It features a turbo wave rim for efficient material removal and a fine tooth design for smooth, precise cuts.

## Product Overview

### Turbo Wave Diamond Cutting Disc

This professional-grade diamond cutting disc features a specialized turbo wave rim designed for efficient material removal and reduced heat buildup during operation. The fine tooth configuration ensures a smooth, precise cut while minimizing chipping and breakage on delicate materials. Engineered for versatility, this disc is suitable for both wet and dry cutting applications.

## Technical Specifications

### Usage Compatibility

Wet Cutting • Dry Cutting

### Key Design Features

- Turbo wave rim design
- Fine tooth configuration
- Reduced heat buildup technology

### Suitable Materials

Concrete, Stone, Ceramic Tile, Wall Trough
