

Turbo Wave Diamond Saw Blade

This blade is suitable for use on granite, marble, roofing tiles, and building materials. The turbo wave design reduces vibration and enhances cooling for extended blade life.

Product Overview

Turbo Wave Diamond Saw Blade

The Turbo Wave Saw Blade is engineered for fast, clean cuts in a variety of materials including concrete, brick, and stone. Its unique wave design reduces vibration and enhances cooling, which results in extended blade life and improved cutting performance. This high-quality diamond matrix blade is designed for both wet and dry applications, ensuring professional results with minimal chipping.

Technical Specifications

Available Diameters

- 105mm
- 115mm
- 125mm
- 150mm
- 180mm
- 200mm
- 230mm

Suitable Materials

Concrete, Reinforced Concrete, Cured Concrete, Bricks, Masonry, Stone

Cutting Method

Wet Cutting, Dry Cutting
