Product Overview

Precision-Engineered Center Housing

This center housing is designed specifically for HY40V and HE400VG turbocharger models. It serves as a critical structural component, providing the necessary support and precise alignment for the rotating assembly to ensure optimal performance. Built to withstand high-temperature and high-pressure environments, this housing is engineered for durability and reliable operation in demanding conditions.

Technical Specifications

Part Identification

Type	Identifier
Part Number	H4020022
OE Number	4041110H

Compatible Models	HY40V, HE400VG
Cooling System	Water-cooling
