

Turbocharger for Perkins 1106D Engine C6.6

This turbocharger enhances engine performance by forcing more air into the combustion chamber. It is engineered to meet the stringent quality standards and performance requirements of Perkins engines.

Product Overview

High-Performance Turbocharger

This turbocharger is specifically designed for the Perkins 1106D Engine C6.6, engineered to enhance engine performance by optimizing air intake into the combustion chamber. By increasing air density, it effectively boosts power output and contributes to improved overall fuel efficiency. Built to rigorous standards, this component ensures the reliability and longevity required for demanding engine applications.

Technical Details

Condition	
Remanufactured	
Compatible Part Numbers	2674A256, 315-9810, 2674A237, 10709880002, 10709700002
Engine Compatibility	Perkins 1106D Engine C6.6
