

Turpentine Oil Solvent for Industrial Use

This turpentine oil is obtained by the distillation of resin from live trees, mainly pines. It is primarily used as a solvent and thinner in paints and varnishes, and also serves as a raw material in the chemical industry.

Product Overview

Industrial-Grade Turpentine Oil

This turpentine oil is a high-quality solvent obtained through the distillation of resin from live trees, primarily pines. It serves as a versatile thinner for paints and varnishes and acts as an essential raw material for the chemical industry in synthesizing various organic compounds. Designed for professional industrial applications, it is suitable for cleaning, degreasing, and integration into specialized chemical formulations.

Technical Specifications

Primary Applications	Solvent, Paint Thinner, Chemical Synthesis, Cleaning, Degreasing
-----------------------------	--

Logistics and Packaging

Supply Capacity	Standard industrial blue drums
------------------------	--------------------------------

Packaging Format	Standard industrial blue drums
