

Turret Milling Machine

This milling machine is designed with high sensitivity and reliability. It offers convenient operation and maintenance.

Overview

Versatile Precision Milling

The 4SB-DV Turret Milling Machine is engineered for high-performance milling operations, offering robust construction for superior stability and precision. Featuring a variable speed head and a precision-ground table with dovetail ways, it ensures smooth, accurate movement for demanding tasks. This machine is an ideal solution for tool and die making, mold production, and general machining applications.

Technical Specifications

Main Motor Power

3 HP

Main Motor Power

Table Size	254 mm
Table Length	1270 mm
Spindle Taper	NT30 #R8
Net Weight	1250 kg

Performance

Travel Dimensions

Axis	Travel Distance (mm)
Left/Right	780
Before/Behind	420
Up/Down	400

Spindle Speed Range	80-5440 RPM (16 Steps)
---------------------	------------------------

Features

Key Features	Variable Speed Head, Precision Ground Table, Dovetail Ways, Integrated Coolant System
