## Product Overview

### High-Performance TV Speaker

The Y135-820 is a professional-grade speaker specifically engineered to deliver optimal audio clarity and fidelity for TV audio systems. Its robust construction ensures long-lasting durability, while the compact design allows for seamless integration into a wide variety of television models. This component provides balanced sound reproduction to significantly enhance the viewing experience for end-users.

## Technical Specifications

### Electrical Characteristics

| Parameter                 | Value     |
|---------------------------|-----------|
| Nominal Impedance         | 4Ω        |
| Effective Frequency Range | 85-5000Hz |
| Harmonic Distortion       | d7%       |
