

Twin-Cylinder Air Compressor Pump

This twin-cylinder air compressor pump is designed for demanding applications. It features a cast iron construction for durability and efficient heat dissipation.

Product Overview

Professional Twin-Cylinder Air Compressor

The TC-50 is a robust twin-cylinder air compressor pump engineered for demanding industrial and commercial applications. Built with high-grade cast iron, it provides exceptional durability and superior heat dissipation. Precision-engineered components ensure smooth, vibration-minimized operation for reliable performance in heavy-duty environments.

Technical Specifications

Construction Material	Cast Iron
Cylinder Configuration	Twin-Cylinder

Performance Features

Performance Highlights

2

Cylinder Count

Design Benefits

- Optimized cylinder design for maximum air delivery
- High-flow air intake system
- Integrated reliable lubrication system
- Vibration-minimized operation

Certifications & Compliance

Suitable Applications	Industrial, Commercial
