

Twin-Cylinder Oilless Air Compressor Pump

This oilless piston air compressor pump is engineered for dependable and efficient air compression. Its twin-cylinder build increases output while minimizing vibration.

Product Overview

Twin-Cylinder Oilless Air Compressor Pump

This twin-cylinder oilless air compressor pump is engineered for reliable and efficient air compression in professional environments. Its oilless design ensures clean air delivery, making it an ideal choice for sensitive pneumatic applications where oil contamination must be avoided. Built with durable materials, this pump provides consistent performance with reduced vibration, supporting a wide range of industrial equipment and systems.

Performance Metrics

Rated Power

1250 W

Power

Air Flow Capacity

Pressure	Flow Rate
0.7 MPa	e6.9m ³ /h
0 MPa	e11.7m ³ /h

Technical Specifications

Insulation Class

Class B

Voltage/Frequency	220V/50Hz
Rotation Speed	1400 r/min
Rated Pressure	0.7 MPa
Startup Pressure	0 MPa
Noise Level	79 dB(A)
Capacitor	30 μ F

Physical Characteristics

Dimensions	305mm x 160mm x 288mm
Weight	17 Kg

Operating Environment

Ambient Temperature Range

5°C to 40°C
